Erideon Group

Brief on Company and the key proposition

Erideon Group is a Singapore headquartered company with over 15 years of experience in the business process and collaborative software space. Erideon Group's workflow enablement and management applications empower companies to achieve maximum output by streamlining various functions within organisations. Automatically the software also collects and retains vast amounts of information creating a deep repository of productivity, adoption and compliance metrics, driving continuous adoption and revision of best practices. This self-sustaining cycle of running operations and creating valuable information assets differentiates Erideon's software solutions.

Since its inception, teams at Erideon have constantly strived to revolutionise the enterprise software technology space. Their technologies empower some of the most innovative solutions.

Erideon Product

Erideon has consolidated its product offering under its solutions platform called InterAct. InterAct is a workflow and collaboration enabler, which then powers an ever-growing stack of plug-in solutions, including HR, finance, manufacturing, ERP, CRM and many others. The InterAct platform seamlessly enables, automates, monitors and optimises workflows and drives collaboration between functions in an organisation.

Erideon has a unique approach to pricing its products and services; driven primarily by proof of value. Customers only start paying for their association with Erideon after they start getting benefits out of the services. Erideon products deliver strong business benefits. All products are designed to assist clients and partners achieve significant and lasting improvements in agility and productivity through process automation, work optimisation and seamless collaboration. Clients are able to use Erideon's business process management software depending on their needs with most of their IT security risks allayed. At the same time, all Erideon technologies can co-exist in the cloud and on-premise.

Erideon Partners

Titled, '**ROBUST**', Erideon has a rapidly expanding Partner program; doubling the number of Partners every year. Keeping in view its future growth strategy and strong Partner led growth philosophy Erideon envisages vastly empowering its associates with tools and support infrastructure in 2011. Erideon Group's partners include Microsoft Corporation, Hewlett Packard, Fuji Xerox Corporation and others.

The considerable simplicity of the InterAct interface accelerates the development of business applications for partners; bringing in greater and faster returns from their relationship with Erideon.

Erideon Consulting

Erideon Consulting practice started with the launch of the group in 1996. It also led to the birth of Erideon's product line. Erideon's strong consulting team continues to thrive by providing on-site and off-site consulting. Using proprietary tools and methodologies the consulting group advises organisations on business process management and re-engineering leading to improvements in their productivity. Erideon also provides functional consulting in specific areas of business by providing business solutions from their specialist partners.

Industry and Verticals

The Erideon Group has worked with clients from diverse industries, geographical locations and sizes to implement technology solutions that provide substantial and lasting improvements in performance and operational efficiency. Through the years, Erideon has gathered a library of best-practices delivered to clients via off-the-shelf solutions that plug directly onto the InterAct platform to provide immediate benefits.

Erideon's platforms integrate seamlessly with other enterprise systems including Microsoft, SAP, Oracle and PeopleSoft. Some of Erideon's clients include Singapore Economic Development Board (EDB), Infocomm Development Authority of Singapore (IDA), DSO National Laboratories, Pacnet Internet Limited, SIM, Sun Microsystems among others. Erideon has been awarded ISO 9001:2008 certification for more than four years with zero non-conformances.
